Abstract. Multidisciplinary health researches have great potential. Multidisciplinary research brings together doctors, pharmacists, lawyers and other scientists. The exchange of experience, scientific and practical cooperation is of great importance. High professionalism, knowledge, experience and high human, spiritual and moral qualities of our doctors, pharmacists, lawyers, scientists and specialists,

powerful scientific, educational, technological and methodological potential of the country give all opportunities to effectively reform the domestic health care system, modernize the pharmaceutical industry and bring Ukrainian medicine and pharmacy to a competitive European and world level.

Keywords: medical law, pharmaceutical law, multidisciplinary research, organization of

pharmaceutical business, technology,
pharmaceutical analysis, pharmacology
of drugs, forensic pharmacy.

I have the honor to address you and welcome doctors, pharmacists, professors, associate professors, faculty, students, guests, participants and organizers, on the occasion of the opening of the XVIII Multidisciplinary Scientific and Practical Conference with International Participation "Medical and Pharmaceutical Law of Ukraine: organization of pharmaceutical business, technology, pharmaceutical analysis and pharmacology of drugs, forensic pharmacy" (<https://medinstytut.lviv.ua/konferentsiya-med-i-farm-pravo>), which will be held 18-19, November 2021 in Kharkiv, Ukraine.

I note that this event annually brings together leading scientists who have dedicated their lives to the noble cause of serving the people of Ukraine and treating patients, finding and creating new drugs, improving legislation in the field of health and pharmaceuticals and providing all segments with vital drugs [1-3].

I am convinced that this conference will be a significant contribution to the development of Ukraine's priority area of health care to improve the quality and timeliness of medical services and optimize the pharmaceutical sector to provide modern, effective, high quality, safe and affordable drugs to all clinics. pharmacological, classification and legal, nomenclature and legal groups [4-6].

This meeting is a great opportunity for professionals, scientists, doctors and pharmacists not only to share experiences, new methods in the treatment of diseases, but also to get acquainted with the organization of pharmaceutical business, forensic pharmaceutical research, pharmaceutical drug analysis, pharmacological research and modern equipment used for technology of creation and industrial production of drugs.

I believe that participation in the conference is a unique opportunity for professionals from different countries and representatives of leading universities in many cities of Ukraine to come together in a hybrid format (online and offline), hear the experience of scientists, EU experts, health care providers, pharmaceutical

companies and pharmacies of various forms of ownership and discuss current issues of medicine and pharmacy.

After all, it is clear that the reform in the field of health care and pharmaceuticals, which takes place in Ukraine on the principles of medical and pharmaceutical law, is impossible without the development of experimental toxicology, industrial and environmental hygiene, drug toxicology, ie modern research in nanotoxicology safety of nanoparticles of heavy metal compounds, drugs, a number of industrial compositions [7-10].

Dear Sirs, I hope that the high professionalism, knowledge, experience and high human, spiritual and moral qualities of our doctors, pharmacists, scientists and specialists, powerful scientific, educational, technological and methodological potential of the country give all opportunities to effectively reform the national health care system in order to modernize the pharmaceutical industry and bring Ukrainian medicine and pharmacy to a competitive highest European and world level.

The exchange of experience, scientific and practical cooperation is of great importance in achieving the goal of the conference. Therefore, I would like to express my special gratitude to the organizers and participants of the conference for the opportunity to communicate with each other, establish new business contacts and enrich modern knowledge in the field of health, pharmacy and law.

I wish the participants of the multidisciplinary scientific-practical conference fruitful cooperation, inspiration, new creative achievements, scientific discoveries in the name of protection of the rights and freedoms of life and health of patients, people and citizens of Ukraine!
